## Jump Start Program

### Overview

The Jump-Start Program is a safety upgrade program involving 39 rail crossings along the ACE corridor. Improvements at the 39 grade crossing locations were completed as of January 2004. Improvements included:

- New traffic and train signage
- Striping or re-striping of streets
- Updated signal preemption
- Measures to eliminate gate drive-arounds
- Minor Roadway widening
- Installation of active warning devices
- New pedestrian sidewalks and safety protection
- Re-grading and repair of vehicle crossings
- Other measures designed to improve traffic flow or enhance safety

### Eliminating Gate Drive-Arounds

A variety of median improvements were implemented along the ACE corridor to discourage and/or prevent motorists from driving around lowered crossing gates. These improvements included median concrete barriers, four quadrant crossing gates, narrow barrier posts and raised traffic dots. The intersections that have received some type of drive-around protection are listed below:
